Education

University of California San Diego — La Jolla, CA
Bachelor of Science in Computer Science — *Sep 2022 - Jun 2026*

Experience

Mercor — May 2026 – Present
AI Analyst — *Remote*

- Provided human expert review of AI instruction adherence to support RLHF pipelines for leading AI research labs
- Evaluated AI-generated outputs for style adherence, visual quality, and content coherence across tasks
- Applied task-specific rubrics to assess model quality and generate human preference signals for AI training

Owaves — Jan 2026 – Apr 2026
Software QA Engineer Intern — *San Diego, CA*

- Automated core iOS user flows with Swift in Xcode, supporting migration from manual to automated QA
- Validated 10+ TestFlight builds across authentication, profile management, and basic user workflows before release
- Executed 2,000+ regression checks across core iOS functionality, identifying defects before App Store releases
- Investigated and reproduced 20+ production and pre-release bugs, validating fixes against expected behavior

Base86 — Jun 2024 – Aug 2024
Software QA Engineer Intern — *San Diego, CA*

- Validated AI invoice parsing by comparing extracted product, pricing, and vendor fields against source documents
- Investigated feature and production defects by reproducing failures against specifications and documented results
- Executed pre-release smoke tests across login, account creation, invoice processing, and new features

University of California San Diego — Sep 2023 – Jun 2024
Computer Science Researcher (Early Scholars Research Program) — *La Jolla, CA*

- Collected and processed 12K+ Reddit posts using the Reddit API to analyze Roblox parental safety concerns
- Built a Python NLP pipeline to clean and vectorize posts for unsupervised machine learning and topic modeling
- Applied LDA with Gensim to identify 10 latent topics, optimizing topic count with coherence scoring
- Co-authored **IEEE ISTAS '24** paper on gaps between parental concerns and Roblox safety resources

Projects

StockUp | *React, TypeScript, Node.js, CREAO, SpacetimeDB, Coinbase, Zinc API* — Oct 2026

- Co-built an AI paper trading bot platform where profit gains purchased wishlist rewards
- **Owned Coinbase integration** through Node.js using Coinbase for Agents MCP and public market APIs
- Used Coinbase market prices to calculate simulated trade quantities and track crypto portfolio holdings
- Won **Coinbase x402 Trading Agents Track** out of 38 teams at CalHacks 2026

Google Calendar Event Length | *JavaScript, Chrome Extension (MV3), Playwright* — Oct 2026 - Present

- Published a Chrome extension that labels Google Calendar events with duration lengths; 37 installs in 5 countries
- Parsed AM/PM and 24-hour time ranges from Calendar's live DOM via an MV3 content script
- Wrote Playwright tests on sanitized real Calendar markup to catch DOM regressions, run in GitHub Actions CI

CarePilot | *React, TypeScript, Gemini API, Node.js, BrowserUse, Vercel* — Apr 2026

- Built AI wellness platform that converts personalized health insights into real-world actions
- Integrated Gemini API and BrowserUse agents to generate recommendations and automate action workflows
- Developed React and TypeScript UI for health assessments, AI chat, and personalized wellness workflows
- Won **1st Place Best Beginner Hack** out of 67 teams at ACM UCSD's DiamondHacks 2026

Technical Skills

Languages: Python, JavaScript/TypeScript, Java, Swift, C++, SQL, HTML/CSS
Frameworks/Technologies: React, Next.js, Node.js, FastAPI, REST APIs, GitHub Actions, Docker, MongoDB
Developer Tools: Git/GitHub, Xcode, TestFlight, Jupyter Notebook, VS Code, Vercel, Qase
